

shield. R_s even longer and straighter than in the type; R_{2+3} a little longer than R_2 alone. Male hypopygium yellow.

Allotype: ♂, Alsea Mount, Oregon, altitude 1,000 feet, June 2, 1929 (*H. A. Scullen*); allotype in collection of Oregon Agricultural Experiment Station.

The relatively long antennae in the male sex are likewise found in two species in Eastern Asia, *Lipsothrix mirabilis* Alexander and *L. pluto* Alexander.

Erioptera (*Ilisia*) *zukeli* n. sp.

Female.—Length about 6.5 mm.; wing 6 mm.

Generally similar to *E. (I.) sparsa* Alexander (California), differing especially in the coloration and pattern of the wings. Wings with the ground-color brownish yellow to pale brown rather than clear yellow, as in *sparsa*; a heavy pattern of darker brown spots and seams; veins beyond cord with conspicuous dusky seams; main stem of vein *Cu* before *m-cu* with a series of four or five brown clouds, contiguous or nearly so; R_s with similar clouds, especially near base; Anal cells conspicuously washed with brown, including cell *1st A* and a large brown cloud at near midlength of vein *2nd A*; axillary margin in cell *2nd A* seamed with brown; veins brown, only the interspaces of the costal portion more yellow. Venation: R_{2+3+4} short, subequal to basal section of R_5 ; *m-cu* about two-thirds its length before the fork of *M*; cell *2nd A* narrower than in *sparsa*.

Habitat: Idaho.

Holotype: Alcoholic ♀, Coeur d'Alene, April 27, 1937 (*Zukel*).

I take great pleasure in naming this fly in honor of my former student, Mr. John W. Zukel, to whom I am indebted for several interesting Tipulidae from Idaho.

Two New Spiders on Staten Island.—Among some spiders collected by myself on Staten Island, two, *Lycosa aspersa* Htz. and *Myrmarachne albocinctus* (Koch), are first records for Staten Island. A single female of *L. aspersa* was found at Princess Bay, September 9, while several specimens of *M. albocinctus* were taken at Great Kills, July 9 on flowers. The spiders were determined by Mr. W. J. Gertsch of the American Museum of Natural History.—BORYS MALKIN, New York, N. Y.
